Education

Open University Malaysia (OUM) – HUTECH Campus **2022 – 2026 (Expected)**
Bachelor of Information Technology (International Joint Program) *GPA: 3.2/4.0*

Skills

Programming Languages	TypeScript, JavaScript, Python, C/C++.
API Design & Infra	**RESTful APIs**, Node.js (NestJS, Express),.
Databases (NoSQL/SQL)	**NoSQL (MongoDB, Redis)**, PostgreSQL.
IoT & Message Queues	**Internet of Things (IoT)**, **Message Queues (MQTT/EMQX)**, ESP32.
Tools & Workflow	**Version Control (Git/GitHub)**, Gemini API, Cursor.
Soft Skills	English (Fluent).

Work Experience

C&T Electrical Electronics Co., Ltd. **Sep 2025 – Dec 2025**
IT Fresher (Full-Stack & System Integration) *HCMC, Vietnam*

- **System Integration & API Design:** Engineered and deployed highly available RESTful APIs on Windows Server (IIS, PM2), guaranteeing seamless data synchronization for Kiosk operations.
- **Web Development Optimization:** Built and shipped a high-performance branch portal using React and Next.js, leveraging Server-Side Rendering (SSR) to improve load times and SEO.
- **IoT & Hardware Communication:** Validated and stabilized real-time Message Queues (MQTT) between ESP32 hardware sensors and central servers, resolving critical data transmission edge cases.

Highlighted Projects

THỦY TÙNG - Education Promotion Website **2025 – 2026**
Full-Stack Web Platform (React/Next.js, Node.js, Redis) *thuytung.edu.vn*

- **Frontend Development:** Developed responsive and interactive user interfaces using **React and Next.js** to provide a seamless browsing experience for students.
- **Backend & Performance:** Integrated **Node.js** and Redis for robust session management and data caching, ensuring the application handles concurrent traffic spikes smoothly without downtime.

AI Video Editor **2026**
AI-Powered Processing Workflow (TypeScript, NestJS, Gemini AI) *GitHub Link*

- **AI Integration:** Leveraged **Gemini API** and advanced prompt engineering to analyze multimodal video data, automating timestamp generation and highlight extractions.
- **Backend Architecture:** Architected a **NestJS** backend to manage heavy FFmpeg media processing, handling asynchronous tasks and optimizing data pipelines for efficiency.

SAMS - Smart Access Management System **Jan 2026 – Mar 2026**
Distributed IoT Access Control (Node.js, Docker, C/C++) *GitHub Link*

- **System Design & Optimization:** Engineered a Dynamic Risk Engine utilizing PostgreSQL and **NoSQL (MongoDB)**. Optimized in-memory logic to achieve **sub-50ms** decision latency.
- **Containerization & DevOps:** Deployed the ecosystem using **Docker**, building resilient communication pipelines (Socket.io, MQTT) between edge devices and the central server.

Certifications & Activities

- **AI Business Venture Event (HCMC):** Registered Participant, exploring AI tech applications (Jun 2025).
